TRANSFORM

Font stacks, weight and style cues, vertical writing, and transformed text should survive into the exported HTML and SVG without collapsing back to a single fallback face.

DISPLAY AND EDITORIAL COPY

VARIABLE CADENCE

A serif note can keep its rhythm, ornament, and spacing even after the line is extracted into vector-safe text output.

```
font-family: "Monaspace Neon", "C
Consolas, monospace;font-styl
font-weight: 600;
letter-spacing: 0.04em;
```

RTL SIGNAL

MIXED TEXT ROLES

INTERFACE STACK

"Mona Sans", "Segoe UI", sans-serif keeps a humanist fallback instead of collapsing to a generic face.

DOCUMENT STACK

Georgia and Times stay available when the preferred face is missing.

SYSTEM NOTE

Native quads carry rotated text geometry, so transformed runs can keep their live layout when the browser exposes `getBoxQuads()` directly.
