Line Clamp Values

These cards cover the legacy `-webkit-line-clamp` flow, the modern unprefixed `line-clamp` property, the `no-ellipsis` modifier, and an unclamped control. Browsers that do not support the modern values will simply render those cards without truncation.

LEGACY ONE-LINE CLAMP

A single-line clamp should stillappend an ellipsis when the text runs far beyond the width of the card and the browser clips the extra content.

```
display: -webkit-box
-webkit-line-clamp: 1
```

LEGACY TWO-LINE CLAMP

This two-line example mirrors the pattern used by feed car…

```
-webkit-line-clamp: 2
```

No explicit `text-overflow` declaration.

LEGACY THREE-LINE CLAMP

Longer editorial text often wants one more line of headroom before the truncation kicks in, especi…

```
-webkit-line-clamp: 3
```

MODERN TWO-LINE CLAMP

The modern shorthand expresses the same behavior in o…

```
line-clamp: 2
```

MODERN NO-ELLIPSIS

Some components need the visible lines clipped cleanly without

```
line-clamp: 2 no-ellipsis
```

UNCLAMPED CONTROL

This card uses the same copy as th

```
line-clamp: none
```
